POORNA PRASAD D R

Bengaluru, India | 7676457722 | Portfolio | ppoorna166@gmail.com |LinkedIn

SUMMARY

I have practical project experience as a developer in the areas of machine learning, full-stack web development, and cybersecurity. My projects have included a stock market prediction model, CPU scheduling simulator, Tourism Management system and SSH brute-force detection lab. I am skilled in Python, Java, JavaScript, C and PHP, and have a working knowledge of both SQL and NoSQL databases. I am currently pursuing a degree in MCA at PES University and am looking for opportunities to apply my skills in software development , cybersecurity and AI/ML positions.

TECHNICAL SKILLS

- **Programming Languages:** Python, Java, C, C++, JavaScript, Typescript
- **Frontend:** HTML, CSS, React, Next.js
- **Backend:** Node.js, Express.js
- **Databases:** MySQL, MongoDB
- **Tools & Platforms:** XAMPP, Git, GitHub, Windows, Linux
- **AI/ML :** Pandas, Numpy, Scikit-learn, TensorFlow

EDUCATION

Master of Computer Applications (MCA) ⁄ Currently pursuing

PES University, Bengaluru

Bachelor of Computer Applications (BCA) | *2025*

BGS B-School, Bengaluru
CGPA: 8.04

Pre-University College | *2022*

Aacharya Pre-University College
Percentage: 83%

PROJECTS

Stock Market Predictor | *Full Stack (React.js, Python, Flask, Scikit-learn, etc)*

- Developed a full-stack application that uses historical market data and machine learning to predict stock prices.

CPU Scheduling Simulator & Visualizer | *MERN Stack (MongoDB, Express, React, Node.js)*

- Built a web application to simulate and compare FCFS, SJF, Round Robin, and Priority scheduling algorithms.
- Created interactive Gantt charts and performance metrics to visualize each algorithm's results.

Tourism Booking System / *PHP, MySQL, HTML, CSS*

- Created a booking application with separate user and admin portals, allowing users to browse destinations, check availability, and make reservations.
- Designed a relational MySQL schema to manage bookings, users, and destination data, along with an admin panel for backend content and booking management.
